Main:

```
@Override
public boolean onCreateOptionsMenu(Menu menu) {
    // Inflate the menu; this adds items to the action bar if it is present.
    getMenuInflater().inflate(R.menu.menu_main, menu);
    return true;
}

@Override
public boolean onOptionsItemSelected(MenuItem item) {
    // Handle action bar item clicks here. The action bar will
    // automatically handle clicks on the Home/Up button, so long
    // as you specify a parent activity in AndroidManifest.xml.
    int id = item.getItemId();

    //noinspection SimplifiableIfStatement
    if (id == R.id.action_settings) {
        return true;
    }

    return super.onOptionsItemSelected(item);
}

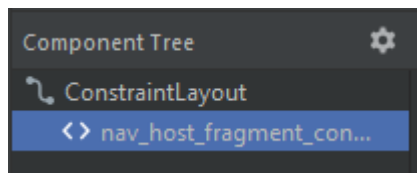

NavController navController = Navigation.findNavController( activity: this, R.id.nav_host_fragment_content_main);
AppBarConfiguration appBarConfiguration = new AppBarConfiguration.Builder(navController.getGraph()).build();
NavigationUI.setupActionBarWithNavController( activity: this, navController, appBarConfiguration);
```

```

44     @Override
45     public boolean onSupportNavigateUp() {
46         NavController navController = Navigation.findNavController( activity: this, R.id.nav_host_fragment_content_main);
47         return NavigationUI.navigateUp(navController, appBarConfiguration)
48             || super.onSupportNavigateUp();
49     }
50 }

```
